On August 14, Axinn partner Mary Helen Wimberly will speak on the Knowledge Group Webinar, “Key Appellate Decisions Shaping Antitrust Strategy.”

Appellate courts are increasingly shaping the direction of U.S. antitrust law, with recent decisions influencing merger reviews, conduct cases, and enforcement priorities. As regulators adopt more aggressive stances, these rulings carry significant implications for how businesses assess risk and structure compliance strategies. In the webinar, Mary Helen will examine the most influential appellate decisions in antitrust and offer practical guidance for adapting strategies in response to shifting judicial interpretations.
